

ANTIQUE HEART PINE **SELECT #2**

Wide Plank Flooring Description

- **Species:** Southern Longleaf Pine
- **Source:** Resawn from large beams taken from demolition projects
- **Heartwood:** 85% - 100%
- **Grain Density:** 8-10 rings per inch and more (many planks have as many as 15-20 rings per inch)
- **Knots:** Sound knots 2" and smaller
- **Holes:** Scattered nail / spike holes up to 1" and possibly some larger plugged holes
- **Cracks:** Occasional vertical aged stress cracks up to 1/16"
- **Face Character:** Since the lumber is resawn from large timbers, the surface of planks will have no original weathering or saw marks
- **Color:** Characteristic reddish "heartwood" color variations with yellowish colors blended in as well
- **Grain:** Mixed patterns (vertical grain available for custom orders)
- **Milling:** Tongue & Groove, end-matched profile with square edges (no bevel), relief cut on back.
- **Available Sizes:** Thickness: 3/4" Width: 3" - 12" Length: 1' - 12'
- **M/C:** 8-10% or less
